

Shekinah Lutumba

Software Engineer

Pretoria, South Africa | s.lutumba15@gmail.com

linkedin.com/in/shekinahlutumba15 | github.com/SLutumba

Early-career software engineer with commercial experience in enterprise financial systems and independent Python backend projects. Curious about how systems work, deliberate about learning, and dependable when collaborating on technical problems. Now working in MIP's Mobile Apps team after completing Flutter training.

PROFESSIONAL EXPERIENCE

Junior Software Engineer - MIP Holdings

Aug 2025 - Present

- Develop and maintain financial-software features across backend services and web interfaces using Progress ABL/OpenEdge, Warp5 and JavaScript.
- Translate business requirements into database operations, business rules, validation and defect fixes, working through code review, manual testing, QA and production release.
- Contributed to payment configuration, bank and branch maintenance, and fixes to reconciliation workflows.
- Completed Dart and Flutter training and transitioned into the Mobile Apps team.

SELECTED PROJECT

Task Management REST API

Python / Flask

github.com/SLutumba/task-management-api

- Built authenticated task workflows with Flask, SQLAlchemy and SQLite, including registration, login, JWT protection and user-scoped ownership checks.
- Implemented Pydantic validation, partial updates, password hashing and separated routes, services, models and serialization helpers.
- Repository includes 98 integration test cases covering authentication, ownership isolation, validation, updates, date persistence and password boundaries.

TECHNICAL TOOLKIT

Professional: Progress ABL, OpenEdge, Warp5, JavaScript.

Projects: Python, Flask, SQLAlchemy, SQLite, Pydantic, REST APIs, JWT, pytest, Git/GitHub, HTML/CSS.

Mobile: Dart and Flutter (training completed; now working in the Mobile Apps team).

Developing: BLoC and Cubit.

EDUCATION

Diploma in Computer Systems Engineering

In progress

Tshwane University of Technology

Academic foundation in programming, object-oriented programming, networking, computer systems and electronics.
